**MR-2300 SERIES**

**Fire Alarm Control Units**

Secutron’s MR-2300 Series fire alarm control panels consist of six and twelve zone models which are equipped with a two line by 20 character back-lit LCD display, numerical keypad and an integrated UDACT/Digital Communicator. The MR-2300 family also includes a twelve zone model that is equipped with an LED display and an integrated UDACT/Digital Communicator. In addition the MR-2300 Series family includes remote LCD annunciators, LED annunciators and remote smart relay modules.

The MR-2300 Series panels are ideal for both new and retrofit applications. Designed for small to medium commercial, institutional and industrial occupancies, these panels are powerful enough to meet today’s installation demands. The MR-2300 Series panels are configurable by the keypad for onsite programming or by a PC for both onsite and remote programming. Easy to install and simple to operate and configure, the MR-2300 Series panels enable the installer to configure the system to meet their specific requirements.

The MR-2300 Series panels are equipped with a 5 Amp power supply, 4-wire resettable smoke power supply (300mA max.) and an RS-485 interface for remote LCD annunciators, LED annunciators and Remote Smart Relay modules.

All MR-2300 Series panels come complete with a red door, black enclosure, durable CAT-30 lock and key and space to mount up to 12 AH batteries. Optional trim rings are available for semi-flush mounting.

**Features**

- Listed to UL 864, 9th edition
- Available in six and twelve zone models
- Available in LED and LCD Display configurations
- LCD Display versions are equipped with a 2 line by 20 character back-lit LCD display and numerical keypad
- Integrated UDACT/Digital Communicator on select models
- Front panel and PC programmable
- LED Display versions are front panel (using CFG-300 configuration tool) and PC programmable
- Remote upload/download capabilities
- Base panel is equipped with Class “B” (Style “B”) initiating circuits which may be configured as Class “A” (Style “D”) using a Class “A” converter module
- Initiating circuits may be configured as Alarm, Verified Alarm, Waterflow Alarm, Sprinkler Alarm, Latching or Non-Latching Supervisory, Monitor and Trouble-Only
- Base panel is equipped with Class “B” (Style “Y”) indicating circuits which may be configured as Class “A” (Style “Z”) using a Class “A” signal converter module
- Audible signals may be configured for Steady, Temporal Code, California Code and March Time
- Indicating Circuits may be configured as Silenceable or Non-Silenceable for both signals and strobes
- Built-in sync protocols for the following strobe manufacturers: Mircom, Amseco, System Sensor, Gentex, Faraday and Wheelock
- Relay contacts for Common Alarm, Auxiliary/Alarm (Disconnectable), Common Supervisory and Common Trouble
- Configurable Signal Silence Inhibit, Auto Signal Silence and One-Man Walk Test
- Subsequent Alarm, Supervisory, and Trouble operation
- RS-485 Interface for Remote LED Annunciators, LCD Annunciators and Remote Smart Relay Modules
- Two event history logs comprised of a 200 event alarm log for alarm related events and a 200 event general log for all other events
- 5 Amp Power Supply
- Optional modules for additional internal relay circuits and City Tie/Polarity Reversal
- Optional trim rings for semi-flush mounting

Catalog Number 1019  •  Not to be used for installation purposes.
Features

Initiating Circuits
The MR-2300 Series panels are equipped with Class “B” (Style “B”) initiating circuits. The initiating circuits may be configured as Class “A” (Style “D”) using an MR-2300-A Class “A” converter adder module.

Each Initiating circuit may be configured for one of the following modes of operation:

• Alarm (Without smoke detector verification)
• Verified Alarm (With smoke detector verification)
• Waterflow Alarm (Water flow sensors)
• Sprinkler Alarm (Sprinkler flow sensors)
• Latching Supervisory
• Non-Latching Supervisory
• Monitor (non-latching input used mainly for correlating to a relay circuit)
• Trouble-Only (for monitoring a trouble condition from an external device)

Indicating Circuits
The MR-2300 Series panels are equipped with Class “B” (Style “B”) indicating circuits. The indicating circuits may be configured as Class “A” (Style “Z”) using an MR-2300-NC4 or MR-2300-NC2 Class “A” signal converter adder module. The audible signals may be configured for Steady, Temporal Code, California Code and March Time.

Each of the indicating circuits may be configured for one of the following modes of operation:

• Silenceable Signal
• Non-Silenceable Signal
• Silenceable Strobe
• Non-Silenceable Strobe

The MR-2300 has built-in sync protocols for the following strobe manufacturers; Secutron, Amseco, System Sensor, Gentex, Faraday and Wheelock.

i3 Series Protocol
The MR-2300 Series panels have the i3 Series protocol built-in. The panels support the two-wire i3 Series smoke detectors (2W-B/2WT-B). These i3 series detectors communicate with the MR-2300 to provide the following status information:

Open circuit trouble
This trouble indicates that loop is broken.

Communication trouble
This trouble indicates that there is a fault in the line or the line is too noisy, the panel cannot communicate with the devices.

Dirty device
This trouble indicates that one or more device on the i3 zone is dirty.

Out of sensitivity
This trouble indicates that one or more device on the i3 zone is out of sensitivity range and cannot detect an alarm condition.

Freeze trouble
This trouble indicates that a device on the i3 zone has detected a freeze condition, e.g. the temperature is below 41°F / 5 °C (available only on model 2WT-B).

The built-in protocol removes the need for the 2W-MOD Maintenance Module.

UDACT/Digital Communicator
The MR-2300 Series panels are equipped with a fully integrated UDACT/Digital Communicator which allows for the reporting of events to a monitoring facility. The UDACT/Digital Communicator can be configured for single or dual line operation and uses the Security Industry Association (SIA) and Ademco Contact ID protocols. The UDACT/Digital Communicator is configured via the main display and keypad on the main panel.

In addition to its reporting functions, the integrated UDACT/Digital Communicator can be used to connect to the MR-2300 panel from remote computers for uploading and downloading of configuration data. It also allows for the viewing of the event history logs. The MR-2300 series panels have two event history logs comprised of a 200 event alarm log for alarm related events and a 200 event general log for all other events.

The integrated UDACT/Digital Communicator can be configured for either DACT or UDACT operation. In DACT mode the Digital Communicator reports common alarm, trouble and supervisory information. In UDACT mode the Digital Communicator reports point specific information.
MR-2300 Series LCD Version Models

MR-2306-DDR Six Zone LCD Display Fire Alarm Control Panel
The MR-2306-DDR is equipped with six Class “B” (Style “B”) initiating circuits and two Class “B” (Style “Y”) indicating circuits rated @ 1.7 Amps maximum. (Total of 5 Amps) The MR-2306-DDR is equipped with a built-in UDACT/Digital Communicator. One MR-2300-A Six Initiating Circuit Class “A” Converter Modules may be used for Class “A” (Style “D”) wiring of the initiating circuits. One MR-2300-NC2 Two Indicating Circuit Class “A” Converter Module may be used for Class “A” (Style “Z”) wiring of the indicating circuits. The cabinet will support up to 12 AH batteries. The panels can be semi-flush mounted with the optional MR-2300TRB trim ring. Note: Not ULC listed.
Dimensions
MR-2306-DDR: 20”H x 14.5”W x 4.5”D
MR-2306-FT: 22.5”H x 17”W

MR-2312-DDR Twelve Zone LCD Display Fire Alarm Control Panel with UDACT/Digital Communicator
The MR-2312-DDR is equipped with twelve Class “B” (Style “B”) initiating circuits and four Class “B” (Style “Y”) indicating circuits rated @ 1.7 Amps maximum. (Total of 5 Amps) Two MR-2300-A Six Initiating Circuit Class A Converter Module may be used for Class “A” (Style “D”) wiring of the initiating circuits. One MR-2300-NC4 Four Indicating Circuit Class “A” Converter Module may be used for Class “A” (Style “Z”) wiring of the indicating circuits. The MR-2312-DDR has a built-in UDACT/Digital Communicator and the cabinet will support up to 12 AH batteries. The panel can be semi-flush mounted with the optional MR-2312-FT trim ring. Note: Not ULC listed.
Dimensions
MR-2312-DDR: 26”H x 14.5”W x 4.5”D
MR-2312-FT: 28.5”H x 17”W

MR-2300 Series LED Version Models

MR-2312-LDR Twelve Zone LED Display Fire Alarm Control Panel with UDACT/Digital Communicator
The MR-2312-LDR is equipped with twelve Class “B” (Style “B”) initiating circuits and four Class “B” (Style “Y”) indicating circuits rated @ 1.7 Amps maximum. (Total of 5 Amps) Two MR-2300-A Six Initiating Circuit Class “A” Converter Modules may be used for Class “A” (Style “D”) wiring of the initiating circuits. One MR-2300-NC4 Four Indicating Circuit Class “A” Converter Module may be used for Class “A” (Style “Z”) wiring of the indicating circuits. The MR-2312-LDR is configurable by the keypad (using the CFG-300 Configuration Tool) for onsite programming or by a PC for both onsite and remote programming. The MR-2312-LDR has a built-in UDACT/Digital Communicator and the cabinet will support up to 12 AH batteries. The panel can be semi-flush mounted with the optional MR-2312-FT trim ring.
Dimensions
MR-2312-LDR: 26”H x 14.5”W x 4.5”D
MR-2312-FT: 28.5”H x 17”W
MR-2300-LCDR Remote LCD Annunciator
The MR-2300-LCDR provides LCD remote annunciation through a 2 line by 20 character LCD display. The MR-2300-LCDR provides control switches for System Reset, Signal Silence, Fire Drill and Acknowledge as well as a numeric keypad to access the menu functions. The common control functions can be disabled on a per function basis. The MR-2300-LCDR has LED indicators for A.C. On, Alarm, Supervisory, Trouble and CPU Fail. The MR-2300-LCDR comes complete with a red enclosure and a CAT-30 Lock and key. Note: ULC Listed as an Ancillary Device.

MR-2306-ATR/MR-2312-ATR Remote LED Annunciators
The MR-2306-ATR and MR-2312-ATR provide 8 or 16 points respectively of LED annunciation. Both models feature bi-coloured LEDs which are auto-configurable for either Alarm (red) or Supervisory (amber). The LED annunciators have indicators for A.C. On, Common Trouble and Signal Silence and control switches for System Reset, Signal Silence, Lamp Test and Buzzer Silence. The MR-2306-ATR and MR-2312-ATR are equipped with a keyswitch which allows for enabling and disabling of the Common Control functions. Both models are available in a red finish and mount in a 4-gang electrical box. Note: ULC Listed as an Ancillary Device.

MR-2306ATR/MR-2312-ATR Smart Relay Module
The MR-2306ATR provides twelve configurable relay circuits, rated @ 28 VDC, 1 amp (resistive). Each circuit can be configured as a Normally Open (N.O.) or Normally Closed (N.C.) contact. Each relay is equipped with an LED that is lit when the relay is energized. The relays can be configured as relay per zone (1 to 1), Common on Alarm, Common on Supervisory or programmable for a logical or adjacent zone configuration. An adjacent zone configuration will turn on an adjacent zone when the configured zone is active. A chaining configuration allows for multiple relays to turn on. The MR-2306SR12 is DIP switch configurable and connects to the RS-485 bus. The MR-2306SR12 comes complete with a red enclosure and a CAT-30 lock and key.

RAM-1016TZDS Remote LED Annunciator
The RAM-1016TZDS Remote LED Annunciator provides 16 points of LED annunciation. The RAM-1016TZDS comes standard with bi-coloured LEDs which are automatically configured for either Alarm (Red) or Supervisory (Amber) and individual trouble LEDs. The RAM-1016TZDS has indicators for A.C. On, Common Trouble and Signal Silence and controls for System Reset, Lamp Test, Fire Drill, Buzzer Silence and Signal Silence. In addition it allows for the control switches to be disabled on a per function basis. The RAM-1016TZDS mounts in a MMX-BB-1001R enclosure.

CFG-300 Configuration Tool
The CFG-300 Configuration Tool is required for onsite front panel programming of the MR-2312-LDR panel. The CFG-300 plugs into the MR-2312-LDR main board to provide a two line by 20 character LCD display. The MR-2312-LDR panel is configured using the CFG-300 and push buttons on the main board. In configuration mode, the initiating and indicating circuit disconnect buttons act as function keys. Removing the zone labels reveals the programming function buttons. The CFG-300 tool is used for configuration purposes only and not for normal operation.
**Adder Modules**

**MR-2300-A Six Initiating Circuit Class “A” Converter Module**
The MR-2300-A converts six Class “B” (Style “B”) initiating circuits on the MR-2300 main board to Class “A” (Style “D”) circuits. The MR-2300-A is equipped with wire leads to connect to the MR-2300 main board. It mounts to the right of the main board Class “B” (Style “B”) initiating circuits. Two MR-2300-A modules are required to convert all twelve initiating circuits on an MR-2312 series panel.

**MR-2300-NC4 Four Indicating Circuit Class “A” Converter Module**
The MR-2300-NC4 converts four Class “B” (Style “Y”) indicating circuits on the MR-2300 main board to Class “A” (Style “Z”) circuits. The MR-2300-NC4 is equipped with wire leads to connect to the MR-2300 main board. It mounts to the right of the main board Class “B” (Style “Y”) indicating circuits and is used with the MR-2312 series panels.

**MR-2300-NC2 Two Indicating Circuit Class “A” Converter Module**
The MR-2300-NC2 converts two Class “B” (Style “Y”) indicating circuits on the MR-2300 main board to Class “A” (Style “Z”) circuits. The MR-2300-NC2 is equipped with wire leads to connect to the MR-2300 main board. It mounts to the right of the main board Class “B” (Style “Y”) indicating circuits and is used with the MR-2306 series panels.

**MR-2306-R6/MR-2312-R12 Relay Circuit Adder Modules**
The MR-2306-R6 provides six configurable relay circuits, rated @ 28 VDC, 1 amp (resistive). The MR-2312-R12 provides twelve Form C configurable relay circuits, rated @ 28 VDC, 1 amp (resistive). On both models each circuit can be configured as a Normally Open (N.O.) or Normally Closed (N.C.) contact. Each relay is equipped with an LED that is lit when the relay is energized. The relays can be configured as relay per zone (1 to 1), Common on Alarm, Common on Supervisory or programmable for logical or adjacent zone configuration. An adjacent zone configuration will turn on adjacent zone when configured zone is active. A chaining configuration allows for multiple relays to turn on.

**MR-2300-PR Polarity Reversal/City Tie Module**
The MR-2300-PR provides outputs for city box and polarity reversal applications. As a city tie module the MR-2300-PR provides an interface between the control panel indicating circuits and a master box. It provides off-premises signal transmission for systems that must comply with NFPA requirements for Auxiliary Protective Systems. As a polarity reversal module the MR-2300-PR provides an interface between the control panel and a reverse polarity receiver. It provides off-premises signal transmission for systems that must comply with NFPA requirements.

**MR-2300-X Active End-of-Line Resistors**
The MR-2300-X are power saving End-of-Line resistors which eliminates the need for an additional battery cabinet or larger batteries in order to meet the 60 hour standby requirement. (Please refer to Battery Calculation Chart in manual for more details.) The MR-2300-X can also be used when larger batteries than can fit in the cabinet are required.
