## MRI-4070

SHORT CIRCUIT ISOLATOR MODULE

## Description

The MRI-4070 SLC Short Circuit Isolator Module is designed to be used with a compatible fire alarm control unit.
The Isolator Module allows part of the communication loop to continue operating when a short circuit occurs on it.
An LED indicator blinks in the normal condition and illuminates steadily during a short circuit condition. Only the LEDs on the devices next to the short illuminate steady for easy identification of a faulty SLC section.

The module will automatically restore the entire communication loop to the normal condition when the short circuit is removed.
This is a hardware only device and does not require an address.

There are no limits to the number of MRI-4070 devices installed on the SLC as long as the total loop current limit is respected.

## Features

- Mounts in a standard 4" square or double gang electrical back box
- Indicating LED provides module status
- Automatic action, no device address required

## Benefits

- Short Circuit isolation, allowing the remaining devices to continue operating
- Easily identify a faulty SLC section
- Self-restoring

## Technical Specifications

| Normal Operating Value | 15 to 30 VDC |
| :--- | :--- |
| Activation Current | 9.6 mA |
| Standby Current | 0.6 mA |
| Temperature Range | $32^{\circ} \mathrm{F}$ to $120^{\circ} \mathrm{F}\left(0^{\circ} \mathrm{C}\right.$ to $\left.49^{\circ} \mathrm{C}\right)$ |
| Humidity | $10 \%$ to $93 \%$ Non-condensing |
| Wiring range on terminals | 22 to 12 AWG |
| Dimensions | $4.625^{\prime \prime} \mathrm{H}$ x $4.25^{\prime \prime}$ W x $1.125^{\prime \prime} \mathrm{D}$ |
| Mounting | Typically mounted on a <br> standard 4" square box. Also <br> compatible with double-gang <br> electrical boxes or Mircom <br> BB-400 surface mount box. |

Ordering Information

| Model | Description |
| :--- | :--- |
| MRI-4070 | Short Circuit Isolator Module |
| BB-400 | Surface Mount Electrical Box |
