

MRI-4010 / MRI-4010-ISO PHOTOELECTRIC SMOKE SENSORS

MRI-4010 / MRI-4010-ISO

Description

The MRI-4010/MRI-4010-ISO smoke detector is a hardwired sensor that continuously monitors the environment to provide early warning of a fire condition and communicates with the panel using a fully digital protocol.

The MRI-4010/MRI-4010-ISO works with with a compatible fire alarm control unit supporting high rates of information exchange with reliable and secure bi-directional communication.

The detector is addressed and programmed using the MIX-4090 hand-held device. Addresses can be selected from a range of 1-240.

This detector ships with a dust cover to protect the device during installation and prior to commissioning.

Two tri-color LEDs on the device provide 360 degrees of status visibility.

A remote LED indicator can be wired directly to the sensor.

Features

- Any combination of MRI-4000 series devices up to 240 can be connected on a single SLC.
- · Different LED colors for Alarms and Troubles.
- Detection of smoke using advanced software algorithms.
- Protection against nuisance alarms caused by dust, insects or other debris.
- · Multiple sensitivity settings.
- Compatible with the full series of MRI-4000 input and control modules.
- The device can be secured by a unique Anti-Tamper feature.
- Address is set with the hand-held device programmer (MIX-4090)
- MODEL OPTION Built-In short-circuit isolator (MRI-4010-ISO)

Benefits

- Open style mounting bases offer easy wiring and low pressure locking.
- 4" or 6" base options available.
- Remote output can be controlled by the panel.
- MRI-4010-ISO is equipped with a bi-directional shortcircuit isolator to protect against wiring faults and loop failure.
- · Low standby current.
- · Base has detachable tab for labeling device address.
- Leverages interrupts to quickly report alarm conditions to fire alarm control panels.
- Magnet test option helps with commissioning and maintenance.

Specifications
